1. Open the hood.
2. Turn the ignition off!
3. Remove the ignition key!
4. Close and lock all doors!
5. Do not open any doors while installing the tuning kit!
6. Wait 5 minutes before beginning the installation

In order to avoid damages at electronic vehicle components, you have to be sure that you have done all necessary methods for **electrostatic discharge**.

Install the electronic in a **waterproof and vibrationless** place. Do not make any changes at the tuning-kit!

Do not expand or shorten the loom.
Overview:
The chiptuning box is attached to the following points:

- Camshaft sensor
- Rail pressure sensor
- Boost pressure sensor
- 12V power supply

Tools needed:
- Cutter

Preparation:
- Move the individual strands of the cable loom to the associated plug connectors
- Put the necessary tool for the side (if needs)
- Put the mounting material to the side
1. **boost pressure sensor**

- The boost pressure sensor is located on the front part of the engine.

- Disconnect the plug from the boost pressure sensor.
- Attach the boost pressure sensor plug to the new loom.
- Connect the plug of the new loom to the boost pressure sensor.
2. camshaft sensor

- The camshaft sensor is located at the rear of the engine near the rail pressure sensor.

- Disconnect the plug from the camshaft sensor.
- Attach the camshaft sensor plug to the new loom.
- Connect the plug of the new loom to the camshaft sensor.
3. **rail pressure sensor**

- The rail pressure sensor is located on the common rail pipe on the rear of the engine.

- Disconnect the plug from the rail pressure sensor.
- Attach the rail pressure sensor plug to the new loom.
- Connect the plug of the new loom to the rail pressure sensor.
4. Battery

◊ Furthermore, you must remove the plastic cover of the battery

◊ Connect the red wire from the new harness to the positive terminal of the battery

◊ Connect the black wire from the new harness to the negative pole of the battery
5. tuningbox

- Finally install the cable towards a suitable position
- The plugs must be engage, so that a safe connection is ensured
- Fix the cable with cable ties
- Connect the tuningbox to the new loom

6. jumper plug

- By using the jumper the vehicle is put in the original condition.
- As soon as you connect the cable loom with the jumper plug the car is in original condition.
